1. Initially, you should think about the answers to these questions...

Which T is a three-horned dinosaur and is the coolest one?	
Which R is the smallest English county?	
Which I is a whip-bearing, fedora-wearing character brought a gun to a knife fight?	
Which N is the most populous African country?	
Which I is brilliant Scottish misanthrope who wrote Trainspotting?	
Which D is an early 20th century art movement valued the surreal, the abstract and once, famously, a urinal?	
Which A is a noble gas that sits in period 3 of the periodic table of elements?	
Which D is a comic book that is the natural bedfellow of the Beano and features Desperate Dan and Bananaman?	
Which A is a maverick punk singer who formed The Slits with Viv Albertine and Palmolive?	
Which N is an English football team who play their home games at Carrow Road?	
Which D is the wacky racer most closely associated with Muttley?	

Which T is the tissue certain members of the Aspden lab most like looking at through microscopes?	
Which O is a four letter country and the only one beginning with said initial?	
Which B is the only (extant) animal whose binomial name is the same as it's common name.	
Which A is the fictional, spooky family that counts Gomez, Morticia, Pugsley, and Wednesday amongst its members?	
Which G is a bird can be found in Red or Black and has a name that means grumble?	
Which O is the American state nestled between Washington and California?	

But where can these answers lead? - you need a digit remember.

2. It has to be genes... Remember you're looking for a digit
